EMORY

If you have **Parkinson Disease** and suffer from trouble with your **bladder**...

The Atlanta VA CVNR & Geriatric Research, Education, & Clinical Center are conducting a research study for persons with Parkinson disease and difficulty controlling their bladder entitled:

“Behavioral or Solifenacin Therapy for Urinary Symptoms in Parkinson’s Disease (BOSS PD)”

E. Camille Vaughan, MD, MS Principal Investigator IRB96757

To qualify for the study, you must:

- Have **Parkinson disease**
- Have **bothersome urinary symptoms**
- Be able to attend clinic and virtual appointments

Each person will be seen privately for a full evaluation at the Atlanta VA Continence clinic. After enrollment, in-person and virtual visits will occur every 2 to 4 weeks and last up to 90 minutes. Participants will be randomized to either medication treatment or behavioral treatment for a total of 12 weeks.
