

Does aerobic exercise improve learning in people with aphasia?

We are studying the effect of aerobic exercise on word learning in people with aphasia. The research study is taking place at the **Atlanta VA Medical Center**.

To participate you must:

- ◆ **Have aphasia caused by stroke**
- ◆ **Not be participating in regular exercise**
- ◆ **Get approval to participate in exercise from a physician (we will explain the study to the physician)**

If you are interested in learning more about the study

Acute Exercise Effects on Word Learning in Aging, Mild Cognitive Impairment and Stroke-induced Aphasia
