# Does brain stimulation improve aphasia treatment?

We are conducting a study to find out if pairing non-invasive brain stimulation with aphasia treatment improves treatment outcomes. The research study is taking place at the Atlanta VA Medical Center.

To participate you must:

- ◆ Have aphasia caused by stroke
- ◆ Be 35-89 years old
- ◆ Meet other eligibility criteria for the study

**If you are interested in learning more about the study**

*Transcranial Direct Current Stimulation (tDCS) as an Adjuvant to Phonomotor Treatment for Aphasia*
