Spatial Cognitive Training in Visual Impairment

Research Investigator: April Maa, M.D.

- Are you over the age of 50?
- Have you had total vision loss within the past 5 years?
- If YES, you may be eligible to participate in a VA sponsored research study.

The purpose of this study is to develop a new training procedure to help those with recent onset of blindness, or severe visual loss, learn to orient themselves to their environment. This study will require three all day testing sessions, two of which include an MRI, at the Atlanta VA Medical Center and Emory University. Also, 1-hour testing sessions at home everyday for three weeks.
