Savvy Caregiver is an evidence-based program designed to equip caregivers with the tools & strategies they need to provide effective care for clients and preserve their own well-being. This 6 hour course will help you apply principles and strategies for dealing with the cognitive, behavioral, emotional and performance losses that dementia causes in persons with the disease. After completing this train the trainer course, you will be able to offer the Savvy Caregiver program at your organization.

Emory Alzheimer’s Disease Research Center, Center for Health in Aging, Atlanta Regional Geriatric Education Center, Atlanta Department of Veterans Affairs Dementia Committee & Center of Excellence for Visual & Neurocognitive Rehabilitation

Proudly Present:

The Savvy Caregiver
Train the Trainer Workshop

With Savvy Author & Master Trainer Ken Hepburn, PhD

Featuring VA Tele-Savvy Veteran Vignettes by Guest Speaker Patricia C. Griffiths, PhD

This course is designed for social workers, nurses, case managers, and geriatric specialists, health care providers in skilled nursing, acute care hospitals, home health aides, health educators, and clinical administrators.

The Atlanta Regional Geriatric Education Center and affiliated programming is provided by funding from HRSA award # UB4HP19215.
